

BT900

Providing automotive technicians with quick and easy diagnostics for Stop-Start battery systems and standard automotive batteries, including the added value of running electrical system diagnostics.

The BT900 is a fast, affordable and essential service tool for battery resellers and automotive workshops.

**IDLE STOP
START &
AUXILIARY
BATTERY
TESTING**

The BT900 is a professional battery and system tester, that provides users with the ability to quickly and easily determine the condition of a battery both in and out of the vehicle. It also affords the ability to conduct a diagnostic test of the vehicles electrical system.

KEY FEATURES

- Suitable for conventional and Idle Start Stop vehicles
- Suitable for battery types including: 12V Regular flooded, AGM flat plate, AGM spiral plate, VRLA/GEL, Stop-Start Enhanced Flooded (EFB) and AGM
- Starting & Charging system testing
- Complete test report print-out
- Global Testing Standards: CCA/SAE, EN, DIN, IEC, JIS, CA/MCA
- Able to customise information including date & time
- Easy-to-read 4-line LCD display with adjustable brightness
- Print last result without re-testing
- Backward function key to correct setting
- Hard storage case included

SPECIFICATIONS

Code	191022
Description	BT900 Battery Tester
Application	12V batteries, 12/24V starting/charging systems
Test Range	40 – 2000 CCA (SAE)
Voltage Range	8V-30V DC
Cable Length	75cm
Thermal Printer	Integrated
Display	4 line back-lit LCD
Warranty	12 months
